

Web Design II Syllabus

Mrs. Guiliano

kguiliano@mail.flatrock.k12.mi.us

Description: In this class, students will be hand-coding and focusing on various areas of the coding process. The optimal way for students to learn advanced web design skills is to learn how to hand-code HTML5 & JavaScript, without the use of advanced tools such as Dreamweaver. Students will be able to go on to attain advanced knowledge and skills in the web design field with the knowledge learned in this course.

Grading Scale This course will use the district's grading scale located in the Student Handbook.

Grading Criteria: The final course grade will be calculated using the following assessments:

Writing Assignments	15%
Unit Projects	65%
Final Project	20%

Attendance Absences – If a student is absent, it is their responsibility to figure out what they missed. If a student misses a project or writing assignment, they must set up a time to come speak with me before school to complete the assignment.

Topic Outline The following is a tentative outline for the semester.

Unit One – XHTML Review

Unit Two – Creating Web Pages

Unit Three – Formatting Web Pages

Unit Four – Graphics

Unit Five – Scripting

Unit Six – Quality Control

Unit Seven – Website Management & Authoring Tools

Unit Eight/Final Project – Client Website

Rules All school rules listed in the Student Handbook will be enforced (cell phone use in classroom, no food/beverages in computer lab at all because of equipment). Bags and purses should be kept in the student's locker and are not allowed in the classroom due to limited space and safety issues.
